# MARBLE STONE

Marble, a dazzling gem of nature, adds a unique elegance to any space with its unparalleled patterns and diverse colors. This natural and luxurious stone, in addition to its beauty, offers exceptional strength and durability, making it ideal for use in floors, walls, stairs, and other areas of a building.

FR

# Salsali Cream Marble

Salsali Cream Marble is one of the most beautiful and popular types of marble. Its sinusoidal veins and light cream color give it a very attractive appearance. Due to its high resistance, good density, and high polish-ability, it is an excellent choice for use in interior spaces such as floors, walls, stairs, and more. Because of its relatively high porosity, Salsali cream marble is best used in dry environments and requires proper waterproofing in areas with high humidity, such as bathrooms and kitchens.

# Armita Cream Marble

Armita Cream Marble is a type of creamy marble with a calcareous composition that is extracted from various mines. In some varieties, the background color tends to be light, while in others, this luster appears in the form of halos on the surface of the stone and in other areas as snow-like flowers. Some types also have regular waves, while others have complex, intertwined waves with a pink color. If you desire your building to be covered in lustrous stones and you want a brighter space, then Armita Cream Marble is the suitable choice.

# Veined Armita Cream Marble

Veined Armita Cream Marble, is one of the three types of Veined Armita marble. It is distinguished by its beautiful colors, stunning designs, and affordable price. This type of marble is characterized by its creamy and pink color with creamy pink veins and patterns resembling cotton flowers. This type of marble can be used in combination with lighter types of marble, such as Dehbid, to add a touch of tranquility and luxury to the interior decor of your buildings. The reflection of light on it and its reasonable price are another reason for its use in interior decorations.

# Pietra Gray Marble

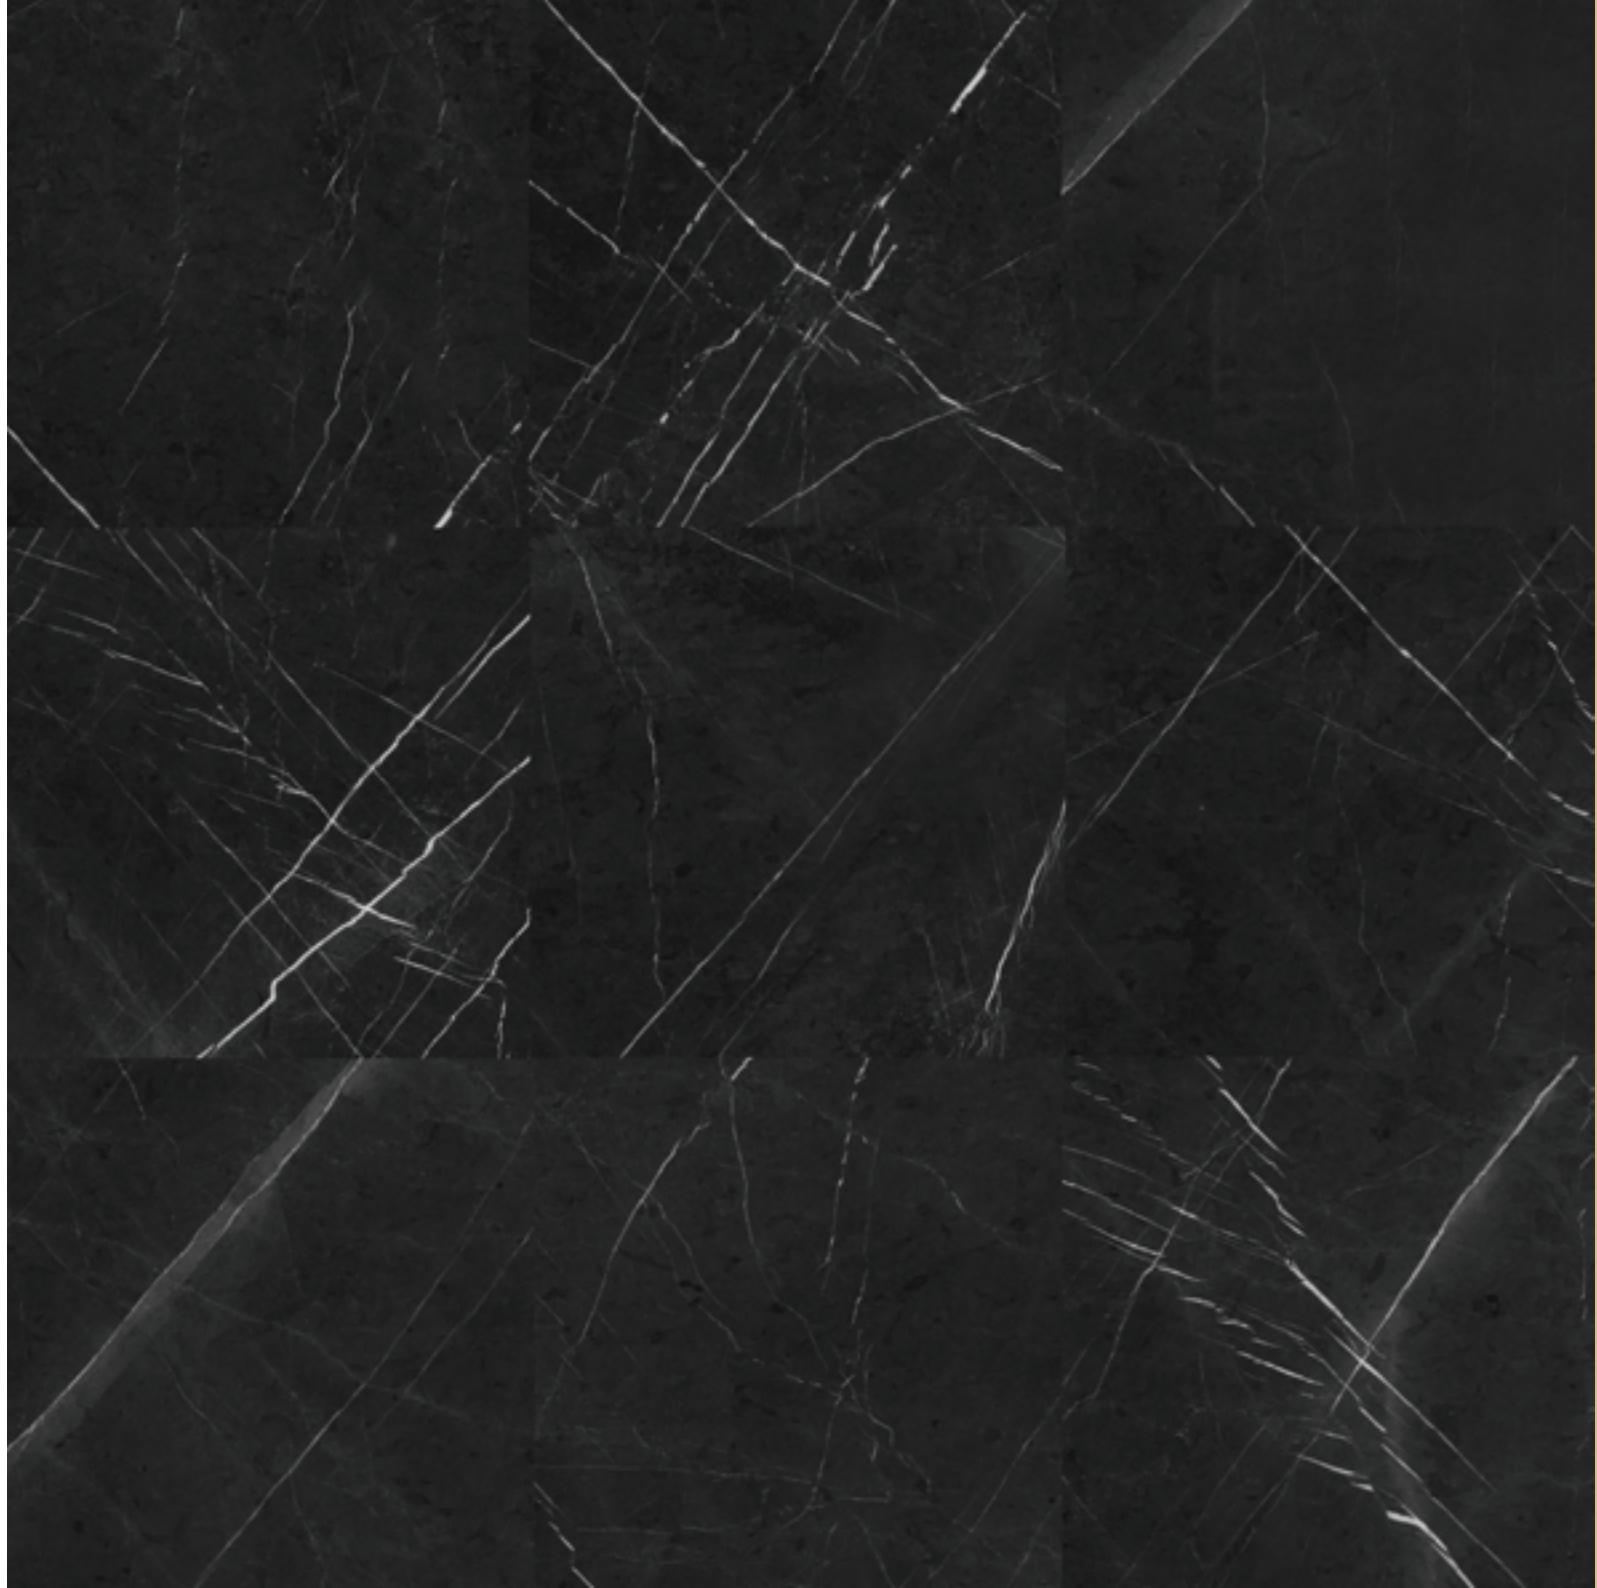

Polished Pietra Gray Marble, as one of the most luxurious and durable stones, is an ideal choice for interior decoration. Its polished surface gives a shiny and beautiful appearance to the space, and with high resistance and low water absorption, it works well in flooring, walls, bathrooms, and kitchens.

In addition to beauty and strength, this stone easily combines with other materials and creates a modern and stylish space.

# Peacock Marble

Peacock Marble is used in a wide range of applications, such as flooring, facades, and interior decorations. The patterns of this stone are characterized by their ability to add an artistic and aesthetic touch to various spaces. Moreover, its easy maintenance and durability make it an ideal choice for modern architectural projects. This stone is suitable for different climates as it can withstand weather changes well. Additionally, its use enhances the value of properties, as it is considered a symbol of luxury and sophistication. Therefore, it is a popular choice among architects and designers who seek to add unique aesthetic touches.

# Black Spider Marble

Black Spider Marble is one of the black marble stones from the Dehbid family, distinguished by its beautiful golden lines. These types of stone come in burnt brown and black colors, where you can see spider-like lines in their design. Like most stones from the same family, these stones are used in the interior spaces of buildings due to the properties of their constituent materials. Using these stones in interior design adds depth and a special beauty to the place, and they can be used as a covering for walls, floors, and even kitchen islands. In addition to its visual beauty, Spider Marble has high resistance and is easy to maintain.

# Harsin Cream Marble

Harsin Cream Marble has earned its reputation as a cornerstone of the construction industry due to its exceptional qualities and enduring appeal. This luxurious stone not only adds a touch of sophistication but also maintains its beauty and luster over time, making it a worthwhile investment for any building project.

Available in a range of hues from creamy white to beige, Harsin Marble is renowned for its distinctive shine and high polish-ability. Its surface is not only visually captivating but also exceptionally durable, surpassing many other types of stone in terms of longevity.

# Simakan Beige Marble

Simakan Beige Marble is characterized by its high durability and hardness, making it resistant to scratches and corrosion, which makes it ideal for use in high-traffic areas. Additionally, it is distinguished by its beautiful natural appearance, veins, and lines that reflect the beauty of nature and add an artistic touch to any interior design.

Simkan stone is an excellent choice for floors, walls, stairs, and columns, and can also be used in the manufacture of furniture and handicrafts. It is easy to clean and maintain, and has good insulation properties for heat and sound, contributing to creating a more comfortable and quiet environment.

# Neyriz Crystalline Marble

Neyriz Crystalline Marble is a white stone with dark gray veins and stripes. Due to its affordable price, Chinese or Nari crystal marble is very popular among white stones and has been widely used in building materials since ancient times.

The use of this stone has changed slightly today due to the type of processing it undergoes, which we will mention in the uses section. Thanks to its resistance and relatively good adhesion, this stone can appear in various applications depending on the type of processing. In the past, it was primarily used as flooring and facade stone in small dimensions, and by observing old buildings, we find that its use was common.

# Anarak Pink Marble

Anarak Pink Marble, a unique stone with a delightful and exclusive color range resembling pomegranate seeds, is extracted from the valuable mines of Anarak city. With its delicate veins and polished surface, this stone brings a touch of natural beauty and authenticity to any space. Due to its high strength and lasting quality, it is an ideal choice for luxurious and distinctive interior designs. This stone creates a warm, pleasant, and yet magnificent atmosphere, adding a lasting and unique touch to any project, from flooring to walls and stairs.

# Green Dragon Marble

Green Dragon Marble, with its deep green color and striking gold and white veins, is one of the most beautiful and eye-catching building stones. With its high density, excellent polish, and resistance to wear, it is an ideal choice for luxurious projects and spaces seeking a unique and distinctive appearance. Green Dragon Marble, due to its natural beauty and color variety, is widely used in both interior and exterior building design, including floors, walls, stairs, and countertops. Besides its aesthetic appeal, this stone offers high resistance to heat and humidity, making it suitable for various environments.

# White limestone

White Limestone, also simply known as <Limestone> holds significant importance in the construction industry due to its smooth and luminous surface. To delve deeper into its characteristics from a structural standpoint, we can highlight its relatively high water absorption rate. This type of stone can be employed in various parts of a building, and its light color contributes to a serene atmosphere within the structure. In recent years, with advancements in science and nanotechnology, limestones have undergone nanotechnology treatments, rendering them more resistant to water absorption. If white granite is treated with nanotechnology and considering its competitive price, it can effectively rival white travertine stones commonly used in building facades.

# TRAVERTINE STONE

Travertine: A Classic Choice for Your Buildings Exterior. With its unparalleled variety of colors and patterns, this natural stone adds beauty and authenticity to your building. Travertine's high resistance to weather conditions and its lightweight nature make it an ideal choice for both interior and exterior building facades.

# Lite Titanium Travertine

Lite Titanium Travertine stands out as a premier, stylish stone that adds a unique touch to any space. This natural stone, adorned with soft veins and captivating patterns, not only boasts stunning beauty but also instills a sense of tranquility and softness into its surroundings. The high resistance of Takab Silver Travertine to abrasion and its low water absorption rate make it an ideal choice for flooring, walls, and building facades. This stone seamlessly blends with various materials and decor styles, offering an excellent opportunity to create a modern, chic, and inviting atmosphere. It's the perfect selection for those seeking a distinctive and unconventional design.

# Dark Titanium travertine

Dark Titanium Travertine, with its warm and inviting brown hue, is a popular natural stone that adds a beautiful and eye-catching aesthetic to any space. With its subtle veins and unique texture, this stone can bring a sense of warmth and intimacy to any environment.

Dark Titanium Travertines high resistance to weather changes and abrasion makes it an ideal choice for use in building facades, flooring, walls, and outdoor spaces. Additionally, this stone easily harmonizes with other materials and decor styles, providing an excellent opportunity to create a modern and stylish space. This stone creates a pleasant and warm decor that brings beauty and strength to the environment.

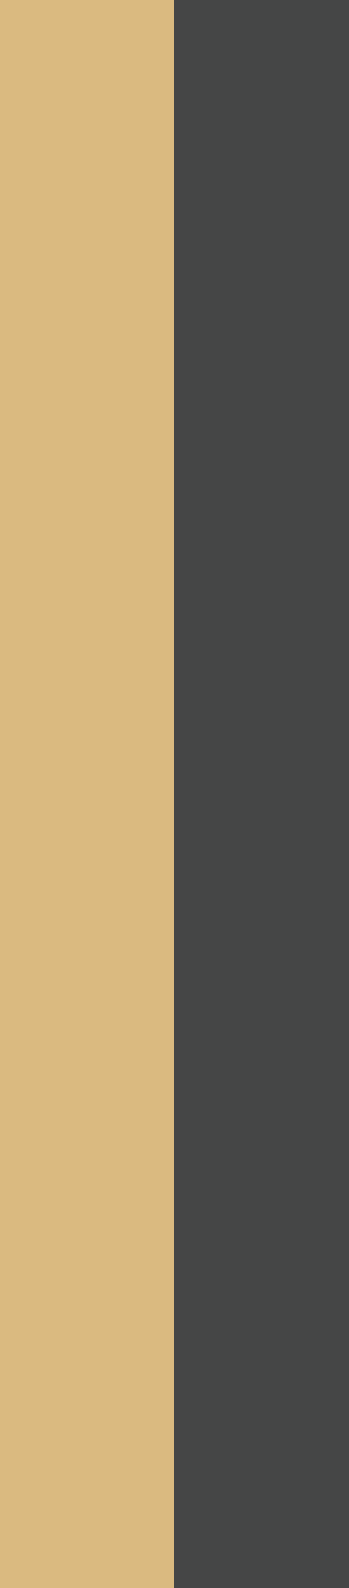

# Abstract White Travertine

Abstract White Travertine offers a pristine white background adorned with delicate, natural veins, exuding an air of elegance and authenticity. This luxurious, high-quality stone, with its dense and uniform texture, is the perfect choice for creating a serene and classic ambiance. The absence of waves in this stone gives it a smooth and seamless appearance, allowing for minimalist and modern designs. With its high resistance to abrasion and water penetration, Abbas Abad White Travertine is exceptionally suitable for both interior and exterior building facades, flooring, and tabletops. This durable and long-lasting stone preserves its beauty for years to come.

# Cream Travertine

Cream Travertine, with its soft and pleasing color, is recognized as a prominent choice in the world of natural stones. The smooth and uniform surface of this stone creates a calm and elegant atmosphere that easily harmonizes with any decor style. Due to its unique features, this travertine, in addition to its beauty, has high resistance to abrasion and low water absorption, making it highly suitable for use in flooring, walls, and building facades. Also, the variety in the dimensions and thickness of this stone allows for diverse design possibilities. Using cream travertine can convey a sense of tranquility and softness to any environment, making it an ideal choice for both interior and exterior spaces.

# Roso White Travertine

Roso White Travertine offers a unique beauty with its light background and delicate, cloud-like cream veins. This natural stone, with its soft color combination, imparts a sense of calm and brightness to any space, creating a pleasant and stylish atmosphere. The uniform and smooth texture of this travertine allows for seamless integration with other materials and design styles. Beyond its aesthetic appeal, Roso White Travertines high resistance to wear and weather conditions makes it an excellent choice for both interior and exterior facades, flooring, and other design applications.

# Veined Noche Travertine

Veined Noche Travertine offers an unparalleled aesthetic with its natural veins and warm, inviting hues. This luxurious natural stone, renowned for its excellent resistance to various weather conditions, is an ideal choice for both exterior and interior applications. The distinctive veined patterns lend a unique and captivating appearance, evoking a sense of tranquility and natural beauty. With a diverse range of patterns and colors, Veined Noche Travertine allows for the creation of versatile designs that complement any architectural style.

# Noche Abstract Travertine

Noche Abstract Travertine with no Veined, characterized by its dark brown color and smooth, uniform texture, is an excellent choice for both interior and exterior decoration. This stone, thanks to its natural beauty and warm color, imparts a sense of tranquility and pleasantness to various spaces.

The high resistance of this travertine to abrasion and its low water absorption rate make it an ideal option for flooring, walls, and building facades. With its ability to harmonize with other materials and decor styles, veined-less noche travertine allows for the creation of modern and stylish spaces.

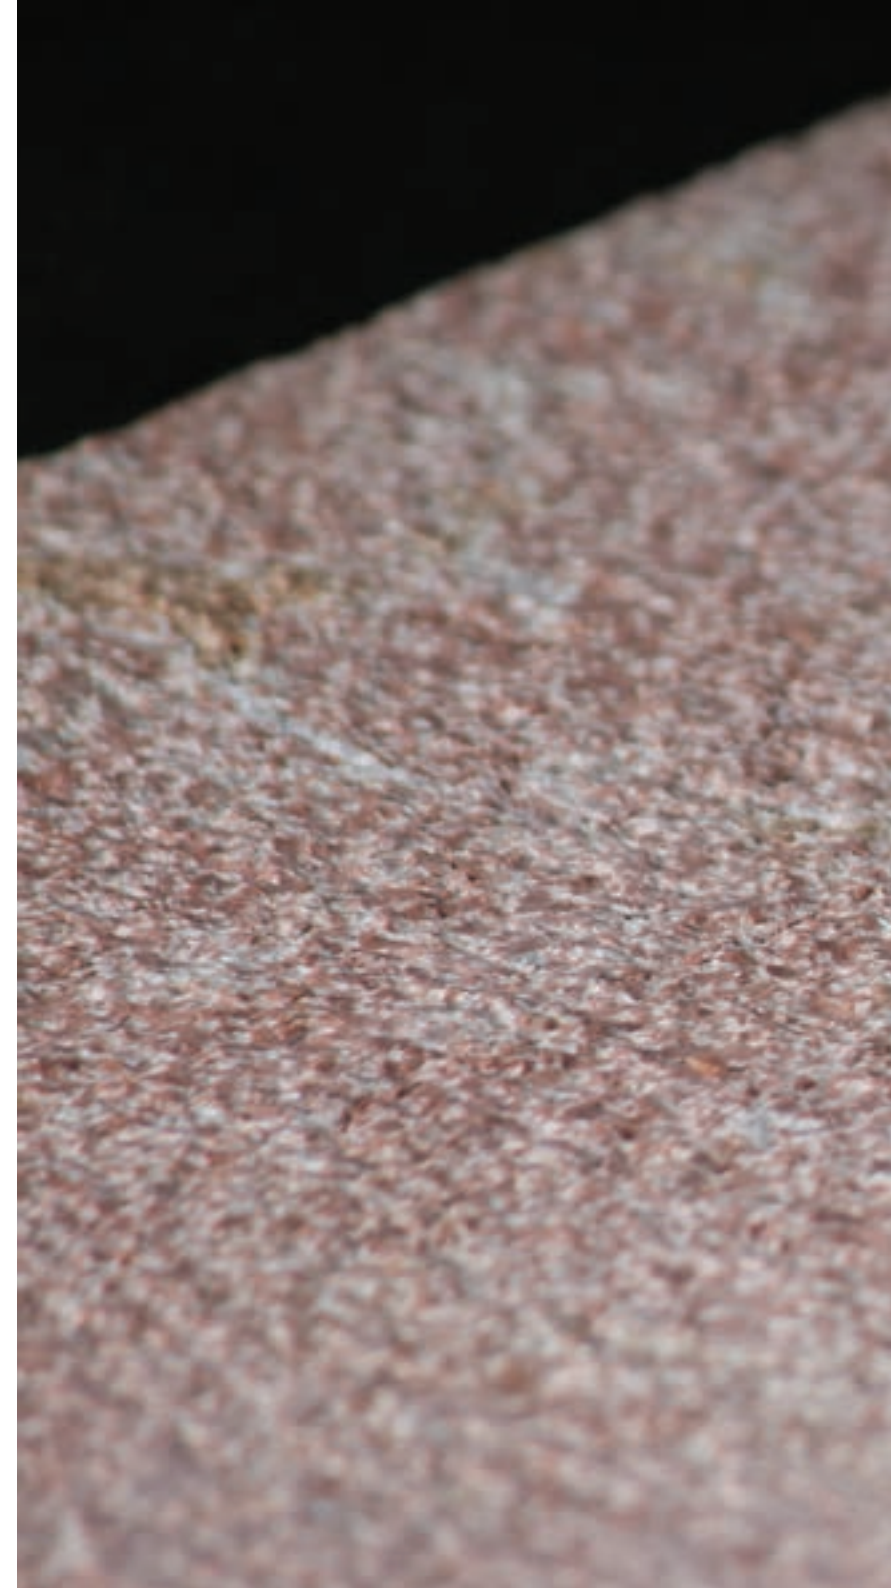

# SPECIAL FINISHES

Through specialized finishes, building stones are transformed into unparalleled works of art. Utilizing cutting-edge technology and the expertise of our artists, we apply a wide range of treatments to natural stones.

# Bush Hammered Pietra Gray Marble

Pietra Gray Marble with white veins, featuring a brush bush-hammered finish, is ideal for both interior and exterior applications due to its high durability and extremely low water absorption. The brush bush-hammered finish provides the stone with a modern, non-slip texture, preventing dirt buildup and making cleaning easy. Its resistance to various weather conditions and acid substances makes it perfect for flooring, facades, lobbies, stairways, pool surrounds, roof gardens, and landscaping in gardens and villas.

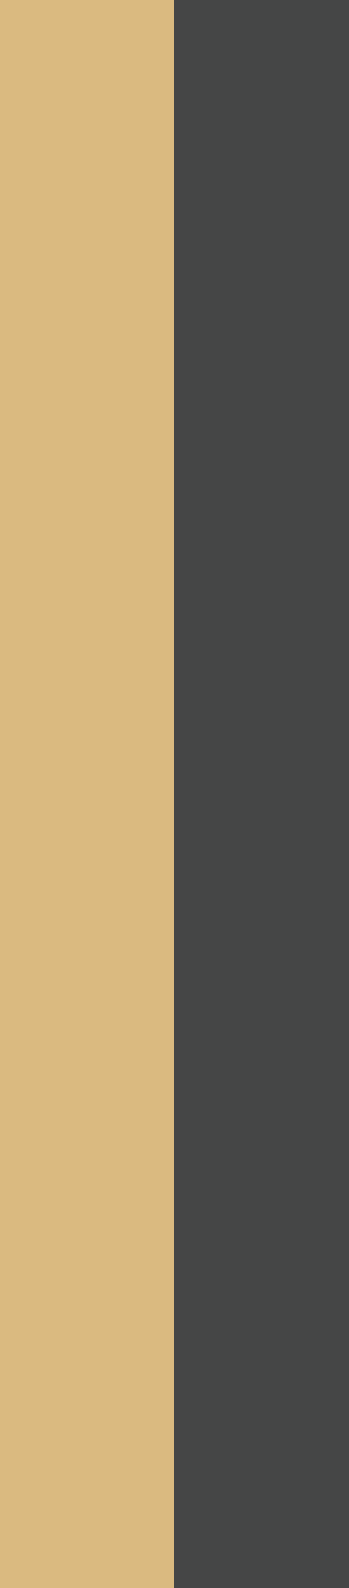

# Bush Hammered Green Granit

Brush Bush Hammered Green Granite, with its unique color and texture, is one of the most popular and durable building stones. Due to its high durability, density, low water absorption, and variety of colors and patterns, it is suitable for use in various weather conditions. The Brush Bush Hammered finish gives the stone a non-slip and anti-stain texture, while its ability to reflect light creates a luxurious and unique appearance. Green granite is suitable for spaces such as interior and exterior building facades, flooring, roof gardens, bathrooms, countertops, and building lobbies. It is available in various patterns such as jungle, olive, jade, and other sorts.

# Sandblasted Neyriz Crystalline Marble

Neyriz Crystalline Marble with a Brush Sandblasted finished surface, featuring a pristine white base and delicate gray veins, is a highly sought-after choice for both interior and exterior design. The sandblasting process minimizes slipperiness, while the brushed finish significantly reduces dirt adhesion, making cleaning a breeze. With its exceptional durability, low water absorption, and adaptability to various climates, Neyriz brush sandblasted is an ideal option for flooring, facades, lobbies, rooftop gardens, kitchens, bathrooms, and other public and private spaces.
